SUMMARY

Master of International Business student (Data Analytics major) with hands-on experience across Power BI dashboarding, SQL data modelling and data cleaning, and requirements documentation. Skilled in cleaning and validating datasets, building DAX-driven reports, and translating business needs into clear specs for Agile teams. Combines analytical rigour with strong stakeholder communication to deliver reporting that supports evidence-based decisions.

TECHNICAL SKILLS & TOOLS

Programming Languages: SQL, DAX

Data Visualisation & BI: Power BI (DAX, Data Modelling), Tableau, Microsoft Excel (Advanced)

Data Analysis: Data Cleaning, Data Validation, Data Modelling, Trend Analysis, Anomaly Detection

Tools: Git, GitHub, Jira, Notion, Azure DevOps, Trello, Miro

Business Analysis: Requirements Gathering, BRDs, FRDs, Use Cases, User Flows, Test Cases, RCA, Manual QA Testing

Data Modelling & Databases: Star Schema, ETL & ELT, Relational Database Modelling, MS SQL Server, MySQL

Soft Skills: Stakeholder Communication, Cross-functional Collaboration, Requirements Documentation

PROFESSIONAL EXPERIENCE

Junior Data and Payroll Analyst | Veiramal Consultancy

Melbourne, Australia

Feb 2026 – Apr 2026

- **Data Management:** gathered, validated, and maintained accurate HR data, ensuring data integrity through cleansing and normalisation.
- **Reporting and Dashboarding:** created and enhanced HR reports and Power BI dashboards to provide actionable insights and compelling data visualisations.
- **Data Analysis:** analysed HR data to identify trends and anomalies, interpreting findings to support decision-making.
- **Collaboration and Communication:** partnered with cross-functional teams, communicated insights, and supported ad hoc data analysis requests.
- Worked alongside internal team members and external agencies to deliver services on time.

Product Operations Coordinator | Quikit

Indore, India

Sep 2024 – Jan 2025

- Coordinated cross-functional activities to build a dynamic CRM, aligning development, UI/UX design, testing, and management to support feature delivery and project milestones.
- Conducted daily stand-ups and weekly scrums for a 15-member team, planning sprint cycles to maintain workflow efficiency and ensure timely delivery.
- Collaborated with UI/UX designers to refine user journeys and enhance the CRM experience; developed detailed use cases and workflow documentation, reducing rework by 25% and improving clarity for developers.
- Served as the communication link between developers and management, resolving roadblocks, aligning priorities, and maintaining delivery timelines.
- Managed backlogs, user stories, and task priorities in Azure DevOps, contributing to a 25% improvement in team efficiency.
- Performed end-to-end manual QA testing across positive and negative scenarios, improving defect detection by 30%.
- Maintained a comprehensive bug log in collaboration with QA testers, supporting accurate tracking, prioritisation, and timely resolution of issues.

IT Project Coordinator | Moreyeahs

Indore, India

Aug 2024 – Jan 2025

- Managed the development of a goal-based application with Role-Based Access Control (RBAC), coordinating requirements, feature planning, and engineering activities to ensure alignment with business objectives.

- Gathered and analysed client requirements, translating business needs into clear functional specifications and reducing scope changes by 25%.
- Created Business Requirements Documents (BRDs), Functional Requirements Documents (FRDs), use cases, user flows, test cases, Root Cause Analyses (RCAs), and Work Breakdown Structures (WBS) to guide development and improve stakeholder understanding.
- Collaborated with UI/UX designers to translate client expectations into intuitive user experiences and communicated technical requirements to developers through detailed documentation, reducing errors by 15%.
- Coordinated between engineering teams and non-technical clients to clarify requirements, resolve queries, and maintain project alignment throughout development.
- Identified project risks, facilitated early conflict resolution, and coordinated corrective actions, reducing delays by 20% and improving delivery timelines by 15%.

PROJECTS

SQL Modern Data Warehouse | Link

- Designed and implemented a modern SQL data warehouse using a Medallion Architecture (Bronze, Silver, and Gold layers) to consolidate disparate sales data from CRM and ERP systems into a single point of truth.
- Developed automated ETL pipelines using SQL Server stored procedures and Bulk Insert techniques to ingest raw CSV data, performing extensive data cleansing to resolve issues such as duplicates, null values, and inconsistent formatting.
- Engineered a Star Schema data model in the Gold layer, creating business-ready views for dimensions and facts that use surrogate keys and integrate data from multiple sources to support advanced reporting and analytics.

People Analytics Dashboard | Link

- Built a multi-page People Analytics Dashboard in Power BI with 41 DAX measures, tracking headcount, turnover, pay equity, engagement, and talent acquisition for a 1,750+ employee workforce.
- Cleaned 10,000+ records across 10 tables in Power Query, resolving 12 data-quality issues including mixed date formats, duplicates, inconsistent casing, and orphan keys.
- Used Power BI's MCP server with Claude to develop and validate complex DAX measures such as size-adjusted pay gap and rolling 12-month turnover rate against the live data model.

EDUCATION

La Trobe University *Mar 2025 – 2026 (Current)*
Master of International Business (Data Analytics Major)

Shri Vaishnav Vidhyapeeth Vishwavidyalaya *Sep 2020 – Jul 2023*
Bachelor of Business Administration

CERTIFICATIONS

- Power BI and Tableau for Data Visualisation
- Professional Diploma in Agile and Project Management
